

Plastic Louvers Type PA-20

Standard size 303 mm x 620 mm

Confection: 1200 mm x 620 mm und 620 mm x 620 mm

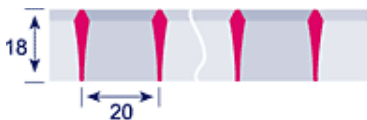

Plastic louvers are produced with high accuracy by injection moulding, with polystyrene being processed as raw material. The high-quality surfaces are obtained by metallising with pure aluminium.

All louvers are custom-made by sawing, milling and special glueing.
